PREFACE

1992 ELK HUNTING AND HARVEST REPORT

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 188 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 187 subpopulations were elk license holders who had drawn one of the 187 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

HUNTERS............	The number of hunters who hunted one or more days
HUNTER DAYS.........	Sum of whole days or portions of days hunted
PERCENT SUCCESS.....	The number of successful hunters divided by the total number of hunters and multiplied by 100
LOWER..............	Lower confidence limit at a level of confidence of 80 percent
POINT..............	The estimated value
UPPER..............	Upper confidence limit at a level of confidence of 80 percent
GEN ELK............	An abbreviation for general elk license
GEN B10............	An abbreviation for general elk license included in the nonresident B10 combination license
SP.................	An abbreviation for special permit
UNKNOWN............	A hunting or kill category where the season type was unknown or the activity illegal

Explanations

The elk hunting and harvest statistics are estimates made from the sample of 59,985 questionnaires representing about 44 percent of all 136,270 elk license holders. Confidence-interval estimates are given for hunters, hunter days, and total harvest. Confidence intervals are given at the 80 percent confidence level, meaning that the actual value will be between the lower and upper limit in four out of five cases. The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

All valid response data were used in the estimates even when some data fields were missing. This is the reason for the various unknown categories given in the report. The unknown license type given in the harvest sections is used to represent elk kills which could not be associated with a particular license/season type. Hunting or harvest activity in an unknown or invalid hunting district within a valid region is represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented

(CONTINUED)

as "XXX". The unknown district or region activities are still incorporated into the regional or state totals respectively. All estimates represented are rounded to the nearest whole number. It is for this reason that rows and columns do not always agree exactly with row or column totals given.

The category called "MISC. PERMIT" on the state summary page (page 163) gives estimates of kills reported by special permit holders when the kill occurred outside of their permit district(s). Most of these kills were legal on their general elk license.

New to the report this year is an addendum on page 164 which gives a breakdown of the kills listed under "MISC. PERMIT" on the state summary page (page 163). The number of kills made outside their special permit district(s) by special permit holders was more significant in 1991 and 1992 than in previous years. This phenomenon was probably due to two factors: (1) the new rule making it illegal for a hunter to kill a bull in his/her special permit area and (2) the exceptional hunting and success in some districts which attracted hunters from other areas. The addendum lists only hunting districts where the kill was greater than 10. To improve the harvest estimates, these kills should be added to the appropriate districts.

Next year we hope to modify the analysis software to include the "MISC. PERMIT" category in each of the districts.

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

ANTLER STATISTICS

MONTANA DEPARTMENT OF FISH, WILDLIFE & PARKS

1992 ELK ANTLER STATISTICS

JUNE 22, 1993

PREFACE

1992 ELK ANTLER STATISTICS

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 188 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 187 subpopulations were elk license holders who had drawn one of the 187 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

ANTLER TYPE...The number of points on each side
FREQUENCY.....The number of occurrences of the given antler type in the given hunting unit within the expanded sample antler data collected
PERCENT.......The percentage of the total represented by each frequency

Explanations

The elk antler point statistics are estimates made from the sample of 59,985 questionnaires representing about 44 percent of all 136,270 elk license holders. The frequencies and percentages are expanded estimates made from the sample data collected for antlered elk with completed antler point counts. Total estimated number killed in each hunting unit is given at the bottom of the frequency column.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the unknown hunting unit categories given in the report. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

This report for 1992 represents the second year that the antler point frequencies have been expanded estimates rather than a frequency count of the collected sample data. This was done primarily to correct the occasional bias explained in the 1990 antler point statistics preface, but the change should also make the results easier to use.

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

1992 ELK KILL LOCATION BY LAND OWNERSHIP

JUNE 28, 1993

PREFACE

1992 ELK KILL LOCATION BY LAND OWNERSHIP

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 188 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 187 subpopulations were elk license holders who had drawn one of the 187 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

HARVEST.......	The estimated number of elk killed
PERCENT.......	The percentage of the total harvest represented by harvest taken in a land ownership category

Explanations

The elk kill location by land ownership statistics are estimates made from the sample of 59,985 questionnaires representing about 44 percent of all 136,270 elk license holders. The frequencies and percentages are expanded estimates made from the sample data collected. Total estimated number killed in each hunting unit is given in the "TOTAL HARVEST" column.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the unknown hunting unit categories given in the report. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

This report for 1992 represents the first year that elk kill location by land ownership data were collected and reported.

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

SPECIAL SEASONS & TENTATIVE QUOTAS

- Applications must be postmarked by the U.S. Postal Service no later than June 1.
- Both resident and nonresident sportspersons are eligible to apply for the following licenses and permits awarded through the special drawings. Nonresidents are limited to, but not guaranteed, 10 percent of a district quota.
- Residents and nonresidents are required to purchase a general elk license prior to applying for a special elk permit or the A-7 antlerless elk license.
- Sportspersons issued a special permit to hunt antlerless elk during all or any portion of the regular season (Oct. 25-Nov. 29) are restricted to hunting and taking **only** an antlerless elk **(whether during the general or ARCHERY ONLY season)** where the permit is valid. Permit holders are entitled to general elk hunting season privileges in all other elk hunting districts except those districts restricted to "hunting by permit only".
- Because some licenses and permits are valid only in a portion or portions of specified hunting districts, sportspersons should carefully note the district choice for which they are applying. A copy of the legal descriptions for "portion of district" areas is available at Fish, Wildlife and Parks Regional Headquarters and by **mail** from the Helena Headquarters, Wildlife Division, 1420 East Sixth Avenue, Helena, MT 59620.

What is an A-7 License?

- An A-7 elk license is a special type of elk hunting license that allows the holder to shoot **only antlerless elk** in the district for which the license is valid. A-7 licenses are available in only a very limited number of areas and, in general, in areas where no other opportunities to harvest antlerless elk exist.
- If a sportsperson applies for and receives an A-7 license, these conditions apply:
  1) Sportspersons may not hold both a general elk license and a special A-7 license.
  2) The holder of an A-7 license must hunt **only** antlerless elk and must confine their elk hunting **only** to the hunting district for which their A-7 license is valid.
  3) They **may not** hunt elk (bull or antlerless) anywhere else in the state during the 1992 season.
- A-7 licenses are available only through the annual special drawings. Both residents and nonresidents may apply for these licenses. If successful in drawing an A-7 license, the sportsperson will be sent a letter of notice along with A-7 license purchasing information.
- The following districts offer A-7 antlerless elk licenses through the special drawings: 240, 250, 261, 270, 282, 311, 329, 520 and 843.

Landowner Preference

- Montana landowners who qualify may receive preference in the elk permit and A-7 antlerless elk license special drawings. To qualify, the applicant must own or be contracting to purchase at least 640 acres of contiguous land used by elk or where elk are known to occur at anytime during the year. If the permit is valid for a portion of the hunting district only, the landowner must own land within that portion.
- Preference is available to resident and nonresident landowners and can be designated to a blood or marriage related individual or a person employed by the landowner. Only one person may use or designate preference in a partnership or corporation.
